OUR DOOR IS ALWAYS OPEN

Here at SCS we are wholeheartedly committed to delivering the highest quality products while offering world-class customer service. Our team takes pride in every facet of what we do. We invite you to get to know who we are. Our doors are always open.

ELEVATOR PRODUCTS INC.
(800) 783-4633

WELCOME

For over four decades, SCS Elevator Products has incorporated innovations to set the standard of excellence in elevator components.

Throughout our 40 year history, SCS has built a reputation for designing and manufacturing the highest quality products for customers while maintaining an industry leading standard of customer service.

OUR MISSION is to continually build and maintain a team of honest, hard-working successful individuals who are committed to servicing our customers. We promise to produce the highest quality products through a certified Quality Management System. We are dedicated to continuous process improvements and to maintain our ISO 9001 certification. Our ethics stand on high integrity and solid core values in our day-to-day commitment to our customers and to our company.

**WE PROVIDE A SAFE WORK
ENVIRONMENT FOR OUR EMPLOYEES.**

Proudly made in the USA, Shipped Worldwide

WHAT CAN **SCS** DO FOR YOUR COMPANY?

DIE CASTING

Our depth of experience in die casting allows us to excel at projects that require tight tolerances and unique finishes. We offer polishing, straight lining, painting, and plating.

METAL STAMPING

SCS provides precision metal stamping services. We provide metal stamping product design assistance and rapid turnaround on production tooling and prototyped parts.

PLASTIC INJECTION MOLDING

In our plastic injection molding department we have a wide range of press sizes that can accommodate a variety of parts. We offer in-mold decorating, and applied decorative finishes.

DESIGN AND TOOL BUILDING

Whether it's adapting an existing tool or designing a new tool from concept, we have the expertise to exceed our customer's expectations. Using three-dimensional modeling for tooling, we can accommodate complete detailed mold designs in-house from simple MUD sets to complex dedicated molds.

SCS Elevator Products Inc. is associated and certified with:

BRAILLE
 SIGNAGE
 BUTTONS
 BARRICADES

- INSERT MOLDING
- PAD PRINTING
- HOT STAMPING
- SONIC WELDING
- LASER MARKING
- PLASTIC PLATING
- MID-VOLUME MOLDING
- IN MOLD DECORATING

Mr. Robley G. Cook

A Brief History of SCS Elevator Products Inc.

Robley G. Cook, a visually impaired man, first recognized the need for directional Braille signage to assist those who are also visually impaired. Cook identified the elevator industry as the primary market for his products and approached elevator manufacturers in the USA, soliciting for their business to purchase metal stamped Braille.

In 1983, Mr. Cook became ill and passed away. This presentation of our products and services is dedicated to the memory of our founder, Robley G. Cook, whose respect for quality and devotion to the service of our customers provides daily inspiration for our evolution and achievements. His ideals are still at the heart of what our company is today.

THE LOGO

The SCS logo stands for innovation, precision, and direction. Its distinctive and highly visible form represents two arrows (one up & down) that communicates the company's core mission of helping the visually impaired and society move forward. The colors are chosen to represent innovation and sustainability as well as manufacturing in the USA.

METAL EMBOSSED / SIGNS

OPTION CODES	CHARACTER FINISH	BACKGROUND FINISH
BSS	Black	Satin Stainless
SSB	Satin Stainless	Black
BMS	Black	Mirrored Stainless
MSB	Mirrored Stainless	Black
BSB	Black	Satin Bronze
SBB	Satin Bronze	Black
BMB	Black	Mirrored Bronze
MBB	Mirrored Bronze	Black
WB	White	Black

DIE CAST

OPTION CODES	CHARACTER FINISH	BACKGROUND FINISH
SNB	Satin Nickel	Black
SBB	Satin Bronze	Black
WB	White	Black
US26B	US26	Black
MSB	Mirrored Stainless	Black
MBB	Mirrored Bronze	Black
NICB	Nickle Painted	Black
BNIC	Black	Nickle Painted
GLB	Goldleaf Painted	Black
BGL	Black	Goldleaf Painted

JAMIE KELLS

I love building relationships with my customers, taking time to fully understand what my customers are looking for and finding a solution to help them. SCS Elevator Products has so many unique products to offer, let me show you how we can be your solution.

SALES AND MARKETING

APPLICATION TECHNIQUE FOR ADHESIVE MOUNTED PARTS

To obtain optimum adhesion, the bonding surfaces must be clean and dry. We recommend you use a cleaning solvent mixture of isopropyl alcohol (rubbing alcohol) and water mixture (50/50 mix). Use proper safety precautions for handling solvent.

It may be necessary to seal or prime some surfaces prior to bonding. For instance, most porous fibred material (e.g wood) will require sealing to provide a unified surface. Firm pressure around perimeter of plate, when applying, develops better adhesive contact and thus improves bond strength.

The ideal application temperature range is 70° to 100° F (21° to 38° C). Application to surface at temperatures below 50° F (10° C) is not recommended because the adhesive becomes too firm to adhere readily. In some cases bond strength can be increased and ultimate bond strength can be achieved more quickly by exposure of the bond to elevated temperatures (e.g 150° F (66° C) for 1 hour). This provides better adhesive onto the surfaces.

Plates may appear to have slight bend. With proper application using the above directions, adhesive should overcome any such bend. If you have any questions regarding these instructions, please contact our office anytime.

CLEANING INSTRUCTIONS

Cleaning can be accomplished by wiping with a damp cloth and wiping dry. Make sure that a very soft cloth such a flannel or equivalent is used and that all wiping is done in the direction of the grain. Make sure that only light pressure is applied when wiping the material. Abrasive cleaners or materials should never be used.
